EDUCATION

University of South Carolina Honors College - Columbia, SC
B.S. Computer Science, Data Science Minor

Expected May 2027
GPA: 4.0

LANGUAGES AND TECHNOLOGIES

Java | Python | C++ | R | MATLAB | HTML/CSS | Jupyter Notebook | Linux/Unix | Git/GitHub | Microsoft OS

COURSEWORK

Algorithmic Design I, II | Adv. Prog. Techniques | Calculus | Discrete Math | Unix/Linux | Digital Logic Design | Data Structures & Algorithms | Software Eng. | Programming Language Structures | Computer Architecture |

In Progress (Spring 2025):

Operating Systems | Intro to Computer Networks | Applied Linear Algebra + Lab | Statistics for Engineers |

RELEVANT EXPERIENCE

University of South Carolina Dep. of IT – *Enterprise Data Networks Student Team Member* April 2025 – Present

- Assists the Department of Information Technology with organizing and tracking decommissioned assets.
- Performs manual factory resets of assets, primarily network switches, using PuTTY serial console.
- Optimized the resetting process by writing a Python script utilizing the pySerial library.

University of South Carolina NSF REU – *Mathematical Foundations of Data Analysis* Summer 2024

- Participated in a research project involving applying deep learning techniques to graph theory.
- Developed a PyTorch deep learning model for proving various mathematical conjectures.
- Held weekly presentations with REU participants explaining graph theory and our deep learning model.

PROJECTS

Language Learning Application Fall 2024

- Java/JavaFX application imitating interactive language learning applications like Duolingo.
- Created both the backend and GUI from scratch with a team of developers in a scrum framework.
- Supports user account creation and management and securely saves user data in JSON file format.
- Applied object-oriented programming principles to create modular, maintainable, and scalable code.

Business Chatbot Spring 2024

- Python-based hardcoded chatbot that answers questions related to a business based on their 10-k Form.
- Web scraper collects 10-k data which is processed and made available on a command line interface.
- Able to handle any user input and report statistics on the interaction after the program is terminated.
- Chosen by the professor as the best example in the class, displayed on the class website.

ACTIVITIES

Tau Beta Pi Engineering Honor Society – *Treasurer* Spring 2025 – Present

- Manages the chapter dues and expenditures and completes financial forms when necessary.

UofSC CEC Diversity Gala – *Event Planning Committee* Fall 2023 – Present

- Gala that brings together CEC students and gives them the opportunity to connect with professionals of various backgrounds and industries.
- Collected and cleaned a list of potential attendees and established lines of communication with them.

HONORS/AWARDS

- Chubb Foundation Scholarship Recipient Fall 2024 – Present
- USC President's Honor List Fall 2023 – Fall 2024
- Tau Beta Pi – Engineering Honor Society Spring 2024 – Present
